PROFILE

I work as a Frontend Developer for about 13 years now.

Highly interested in building scalable, maintainable software with high-quality code and one time delivery. The main reason why I am good at it is because I'm a passionate learner, always seeking for interesting and challenging work and most of all I care about my customer's interest.

Extensive React JS Experience: With 8 years of experience working with React JS, I have developed a deep understanding of its core concepts, best practices, and ecosystem. I have successfully completed multiple React JS projects, demonstrating my ability to leverage the framework effectively.

Additionally, I have some experience with Node.js, Express, and MongoDB. I even built my own web app from scratch, showcasing my versatility and ability to architect robust backend systems to complement my frontend expertise.

EMPLOYMENT HISTORY

Lead Software Engineer (Front-end), Kepler51

Hybrid

Jun 2022 — Present

I started as a part-time developer in Jun 2022, and moved to full-time position as a lead developer.

As a Lead Frontend Developer, organizing tasks, ensuring code quality, managing your team, and refactoring a class component-based app to functional components are all important responsibilities.

Involving my team members throughout the process, encourage their feedback, and provide support whenever needed.

Cypress: The application previously lacked any form of testing. I have since implemented comprehensive testing, achieving coverage of over 80% of the application.

I built my own management rules [civcic.com/team-organization.html](#)

Software Engineer, Rogerhr

Remote

Jun 2021 — Jun 2022

As a Senior Frontend Developer, I contributed significantly to the advancement of our HR Dashboard during my tenure. Here's a summary of my past achievements: Developed automated scripts to simplify common tasks and reduce manual effort

- Full files/code organization
- UI/UX Excellence: I am passionate about creating visually appealing and intuitive user interfaces. By employing modern UI libraries and frameworks like Material-UI or Styled Components, I craft captivating and responsive designs that elevate user engagement and satisfaction.
- Skills: React, Axios, Redux, React Material UI, TypeScript...

Material UI/ Ant Design/Bootstrap

Twitter Bootstrap

UI/UX

Unit Test(Enzyme and Jest)

Node.js

MySQL

AWS

LANGUAGES

English

Serbian

Dutch

German

HOBBIES

Basketball, Gym,
Swimming, Photographing

- In addition to these accomplishments, I led the development of a groundbreaking plugin that enabled users to seamlessly read PDFs and interact with existing files online. This innovative feature added significant value to our platform, empowering users with enhanced functionality and convenience in their day-to-day tasks.

Software Engineer, Swiftlane

Remote

Jan 2017 — Jun 2021

As a lead Front-End developer I work on the new Admin Dashboard for Access Control System.

- Developed a Continuous Integration/Continuous Deployment (CI/CD) pipeline that reduced time-to-deployment from X days to X hours
- Identified and resolved application-level bugs that improved user experience
- Testing and Quality Assurance: I have a strong focus on delivering robust and error-free code. I employ comprehensive unit testing using libraries like Jest and Enzyme, enabling me to identify and address potential issues early in the development process.
- Skills: React, Axios, Redux, React Ant design, Charts etc...

www.swiftlane.com

Front-End Developer, IOV (React.JS)

Remote

Jan 2016 — Jan 2017

Freelance project

I worked on an important, large project with the Back-End team.

- We have worked with Redux and Reducers, creating documentation for all the components which is included in React Bootstrap page.
- Experience in using GIT for pulling and committing the developed content from/into the GIT repository Developed Date Time Picker using Object Oriented JavaScript extensively.
- Developed Date Time Picker using Object Oriented JavaScript extensively.
- Creating components using recat.js and creating documentation for the components.
- GraphQL implementation

Environment: HTML, CSS3, JavaScript, JSON, Reactjs, Redux, Axios, ES6, Unit test, Bootstrap, Visual studio Editor, GIT, CI / CD, GraphQL, JIRA. Gulp, Webpack 4.

Front-End Developer, Zojax

Remote

Nov 2014 — Jan 2016

Freelance project

As a full-time Web Developer at Zojax I have worked as a part of the development team that coded various designs and built modern, responsive websites and apps.

- Developed code for Shadowboxes, Slider Carousals, Tickers, Rotating Headers, Validation and JS animations.
- Created and implemented a custom CSS grid system, with CSS media queries for mobile responsiveness.
- Utilized HTML, CSS, JavaScript, SASS, NPM, Grunt and Git for e-commerce site development.
- Coordinated with the team of UX designers to create new Web Content Management System

Environment: HTML5, CSS3, Twitter Bootstrap, JavaScript, jQuery, Angular, npm/Gulp/grunt

Project:

- <https://www.watters.com/>
